- Central Ferry-Lower Monumental
 - Energization scheduled for early November 2015
 - 450 MW of contracts will have an opportunity to commence firm service starting January 1, 2016
- I-5 Reinforcement Project
 - Final EIS is scheduled to be released to the public in the November/December timeframe
 - Final EIS will include updated cost estimates
 - Record of Decision scheduled for 2016

Legacy NOS Project Update (cont.)

- BPA is currently engaging in final contract actions/TSR confirmations in anticipation of the Big Eddy-Knight and Central Ferry-Lower Monumental project completions
 - Includes PTSA commitments, and transmission requests studied as part of the 2013 Cluster Study
 - Will complete the contract actions for service over the next two months
- In addition, BPA will release the 2017 ATC base case this Fall, which will include updated flowgate capacities based on these energizations
