	New section: 5.11 Technical and Operating Requirements
	New section: Attachment 6 - Notices

SGIP:	
<p>1.6 Queue Position</p> <p>The Transmission Provider shall assign a Queue Position based upon the date- and timestamp of the Interconnection Request. The Queue Position of each Interconnection Request will be used to determine the cost responsibility for the Upgrades necessary to accommodate the interconnection. The Transmission Provider shall maintain a single queue per geographic region. At the Transmission Provider's option, Interconnection Requests may be studied serially or in clusters for the purpose of the system impact study.</p>	<p>1.6 Queue Priority</p> <p>The Transmission Provider shall assign a Queue Priority based upon the date- and time-stamp of the Interconnection Request, except as a new Queue Priority may be assigned per the terms of section 4.2., Parking Lot Status, of the SGIP. The Queue Priority of each Interconnection Request will be used to determine the cost responsibility for the Upgrades necessary to accommodate the interconnection. The Transmission Provider shall maintain a single queue per geographic region. At the Transmission Provider's option, Interconnection Requests may be studied serially or in clusters for the purpose of the system impact study.</p>
New section:	<p>1.6.1 Cost Allocation of Shared Network Upgrades and Transmission Provider Interconnection Facilities.</p> <p>Transmission Provider shall allocate the total costs, on a pro rata basis, of Network Upgrades and Transmission Provider's interconnection facilities that, as determined by the Transmission Provider, are necessary to support the interconnection of any Interconnection Request connecting within five (5) years of the initial date those upgrades and facilities are placed in service.</p>
New section:	<p>1.7 OASIS Posting</p> <p>Transmission Provider will maintain on its OASIS a list of all Interconnection Requests. The list will identify, for each Interconnection Request: (i) the maximum summer and winter megawatt electrical output; (ii) the location by county and state; (iii) the station or transmission line or lines where the interconnection will be made; (iv) the projected In-Service Date; (v) the status of the Interconnection Request, including Queue Priority; (vi) the type of Interconnection Service being requested; and (vii) the availability of any studies related to the Interconnection Request; (viii) the date of the Interconnection Request; (ix) the type of Generating Facility to be constructed (e.g. wind, solar, biomass, combined cycle, base load or combustion turbine, and fuel type); and (x) for Interconnection Requests that have not resulted in a completed interconnection, an explanation as to why it was not completed. Except in the case of an Affiliate, the list will not disclose the identity of Interconnection Customer until Interconnection Customer executes an SGIA or requests that Transmission Provider file an unexecuted SGIA with FERC.</p>
	<p>Before holding a Scoping Meeting with its Affiliate, Transmission Provider shall post on OASIS an advance notice of its intent to do so. Transmission Provider shall post to its OASIS site any deviations from the study timelines set forth herein. Interconnection Study reports and Optional Interconnection Study reports shall be posted to Transmission Provider's OASIS site subsequent to any meeting between Interconnection Customer and Transmission Provider to discuss the applicable study results. Transmission Provider shall also post any known deviations in the Small Generating Facility's In-Service Date.</p>
<p>1.7 Interconnection Requests Submitted Prior to the Effective Date of the SGIP</p> <p>Nothing in this SGIP affects an Interconnection Customer's Queue Position assigned before the effective date of this SGIP. The Parties agree to complete work on any interconnection study agreement executed prior the effective date of this SGIP in accordance with the terms and conditions of that interconnection study agreement. Any new studies or other additional work will be completed pursuant to this SGIP.</p>	<p>1.8 Interconnection Requests Submitted Prior to the Effective Date of the revised SGIP</p> <p>Nothing in this SGIP affects an Interconnection Customer's Queue Priority assigned before the effective date of this revised SGIP, except that such prior Interconnection Requests shall be required to provide a completed Site Permit by two (2) calendar years from the effective date of this revised SGIP or be placed in Parking Lot Status per the terms of Section 4.2. The Parties agree to complete work on any interconnection study agreement executed prior to the effective date of this revised SGIP in accordance with the terms and conditions of that interconnection study agreement. Any new studies or other additional work will be completed pursuant to this revised SGIP.</p>
New section:	<p>1.8.1 If an SGIA has been executed by the Parties before the effective date of this SGIP, then the SGIA will be grandfathered.</p>
New section:	<p>Section 2. (Intentionally omitted)Withdrawal.</p> <p>Interconnection Customer may withdraw its Interconnection Request at any time by written notice of such withdrawal to Transmission Provider. In addition, if Interconnection Customer fails to adhere to all requirements of this SGIP, except as provided in Section 4.2 (Disputes), Transmission Provider shall deem the Interconnection Request to be withdrawn and shall provide written notice to Interconnection Customer of the deemed withdrawal and an explanation of the reasons for such deemed withdrawal. Upon receipt of such written notice, Interconnection Customer shall have fifteen (15) Business Days in which to either respond with information or actions that cures the deficiency or to notify Transmission Provider of its intent to pursue Dispute Resolution.</p>

SGIP:	
New section:	<p>2.1 Queue Priority.</p> <p>Withdrawal shall result in the loss of Interconnection Customer's Queue Priority. If an Interconnection Customer disputes the withdrawal and loss of its Queue Priority, then during Dispute Resolution, Interconnection Customer's Interconnection Request is eliminated from the queue until such time that the outcome of Dispute Resolution would restore its Queue Priority. An Interconnection Customer that withdraws or is deemed to have withdrawn its Interconnection Request shall pay to Transmission Provider all costs that Transmission Provider prudently incurs with respect to that Interconnection Request prior to Transmission Provider's receipt of notice described above. Interconnection Customer must pay all monies due to Transmission Provider before it is allowed to obtain any Interconnection Study data or results. Transmission Provider shall (i) update the OASIS Queue Priority posting and (ii) refund to Interconnection Customer any portion of Interconnection Customer's deposit or study payments that exceeds the costs that Transmission Provider has incurred.</p>
	<p>In the event of such withdrawal, Transmission Provider, subject to the confidentiality provisions of Section 5.5, Confidentiality, shall provide, at Interconnection Customer's request, all information that Transmission Provider developed for any completed study conducted up to the date of withdrawal of the Interconnection Request.</p>
<p>3.2.4 As soon as practicable after the scoping meeting, the Transmission Provider shall tender to the Interconnection Customer a NEPA study agreement authorizing the Transmission Provider, at the Interconnection Customer's expense, to perform environmental review of the proposed interconnection, and setting forth the Interconnection Customer's responsibilities in connection with such environmental review. The Interconnection Customer shall execute and return the NEPA study agreement within 30 days of receipt or its Interconnection Request shall be deemed withdrawn and the unexpended amount of its deposit, if any, shall be returned.</p>	<p>3.2.4 As soon as practicable after the scoping meeting, the Transmission Provider shall tender to the Interconnection Customer a NEPA study agreement authorizing the Transmission Provider, at the Interconnection Customer's expense, to perform environmental review of the proposed interconnection, and setting forth the Interconnection Customer's responsibilities in connection with such environmental review. The Interconnection Customer shall execute and return the NEPA study agreement within 30 days of receipt or its Interconnection Request shall be deemed withdrawn and the unexpended amount of its deposit, if any, shall be returned</p>
New section:	<p>3.5.2.1 A request for extension of time under 3.5.2 above shall be submitted in writing. The Transmission Provider shall not withhold its agreement unless the proposed extension causes delays to the studies for any other Interconnection Request regardless of its Queue Priority.</p> <p>3.5.2.2 If the Interconnection Customer requires an extension longer than ninety (90) Calendar Days, after the extension period has expired and if the agreement has not been executed, the Request shall be placed in Parking Lot Status per the terms of section 4.2.</p>
New section:	<p>3.5.6.1 Interconnection Customer may, within thirty (30) Calendar Days after receipt of the draft report, provide written comments to Transmission Provider, which Transmission Provider shall include in the final report. Transmission Provider shall issue the final Interconnection Facilities Study report within fifteen (15) Business Days of receiving Interconnection Customer's comments or promptly upon receiving Interconnection Customer's statement that it will not provide comments. Transmission Provider may reasonably extend such fifteen-day period upon notice to Interconnection Customer if Interconnection Customer's comments require Transmission Provider to perform additional analyses or make other significant modifications prior to the issuance of the final Interconnection Facilities Report. Upon request, Transmission Provider shall provide Interconnection Customer supporting documentation, workpapers, and databases or data developed in the preparation of the Interconnection Facilities Study, subject to confidentiality arrangements consistent with Section 5.6.1</p>
New section:	<p>3.5.7 Once an Interconnection Request has met all requirements to be offered an SGIA, including completed studies, Site Permit and environmental review, the Interconnection Customer must request a schedule for construction of the interconnection facilities (project). Transmission Provider and Interconnection Customer shall negotiate in good faith concerning the schedule for the construction of Transmission Provider's Interconnection Facilities and the Network Upgrades.</p>

SGIP:	
	Upon completion of the facilities study, and with the agreement of the Interconnection Customer to pay for Interconnection Facilities and Upgrades identified in the facilities study, the Transmission Provider shall decide whether to send the Interconnection Customer an executable interconnection agreement after completing necessary environmental documentation under the National Environmental Policy Act of 1969, 42 U.S.C. § 4321, et seq., as amended, concerning the interconnection of the Small Generating Facility; provided, that the Transmission Provider's decision shall not be subject to dispute resolution. If the Transmission Provider decides to send the Interconnection Customer an executable interconnection agreement, the Transmission Provider shall use Reasonable Efforts to send such agreement within five Business Days after rendering its decision.
New section:	Section 4: Environmental Study Agreement Concurrently with tendering an Interconnection System Impact Study Agreement, (or with tendering a Facilities Study Agreement if the ISIS has been skipped, or within 15 Business Days of the Scoping Meeting if all technical studies have been skipped) Transmission Provider shall tender to Interconnection Customer an environmental study agreement under which Transmission Provider, at Interconnection Customer's expense, shall perform such environmental reviews under the National Environmental Policy Act (NEPA) and other applicable environmental laws, that Transmission Provider deems necessary for Transmission Provider's action(s) related to the proposed interconnection.
	The environmental study agreement also shall set forth Interconnection Customer's responsibilities in connection with such environmental review. Interconnection Customer shall execute and return the environmental study agreement together with any required deposit within 30 Calendar Days of receipt or its Interconnection Request shall be deemed withdrawn and the unexpended amount of its deposit, if any, shall be returned.
New section:	4.1 Site Permit Milestone: The Interconnection Customer shall notify the Transmission Provider in writing when it has received its Site Permit, no later than twenty-five (25) months after the date of tender of the Environmental Study Agreement.
New section:	4.2 Parking Lot: Status
New section:	4.2.1 Loss of queue priority. An Interconnection Request will lose Queue Priority and be assigned Parking Lot Status if the Interconnection Customer fails to complete the Site Permit Milestone as specified in section 4.1, provided that the Interconnection Customer has received the Facilities Study Report.
New section:	4.2.2 Interconnection Studies: The Transmission Provider will not consider in the studies of any other Interconnection Requests an Interconnection Request in Parking Lot Status.
New section:	4.2.3 Deposits: The unspent balance of all interconnection study deposits received for the Interconnection Request shall not be refunded while in Parking Lot Status unless the Request is withdrawn .
New section:	4.2.4 Parking Lot Time limit: An Interconnection Request may remain in Parking Lot status for a period not to exceed two (2) Calendar Years, at which time the Request will be deemed withdrawn under the terms of section 3.6. See section 4.2.7 for extensions.
New section:	4.2.5 New Queue Priority: Upon confirmation of the Interconnection Customer's written notice of its completed Site Permit(s) within the Time Limit specified in section 4.2.4 above, Transmission Provider will change the status of the Request to Study status. A new Queue Priority will be assigned based on the date and time of receipt of such written notice of required Site Permit(s). The Interconnection Request will then have priority over all Interconnection Requests that have not been tendered an Interconnection System Impact Study agreement.
New section:	4.2.6 Re-study: Upon return of the Interconnection Request to Study Status, the Transmission Provider will determine the needed restudy of the Interconnection Request. If additional study funds are required, Transmission Provider shall tender a revised interconnection study agreement. The Interconnection Customer shall return the executed agreement together with any additional deposit required no later than thirty (30) Calendar Days from its receipt.
New section:	4.2.7 Parking Lot Status Extensions:
New section:	4.2.7.1 Extension for Legal or Regulatory Delay: At least thirty (30) Calendar Days before the expiration of the two-year Parking Lot period established in section 4.2.4, Interconnection Customer may request and Transmission Provider shall grant biennial extensions to the timeline because of legal or regulatory delay that is beyond the control of the Interconnection Customer. The Interconnection Customer must affirm in writing to the Transmission Provider that the legal or regulatory delay is beyond the control of the Interconnection Customer.

SGIP:	
New section:	4.2.7.2 Related Transmission Service Extension: If the Transmission Provider's schedule for construction of Network Transmission Facilities necessary for the commercial operation of the proposed Generating Facility is beyond the expected Commercial Operation Date of the Interconnection Request, then Interconnection Customer may request and Transmission Provider shall grant an extension to remain in Parking Lot Status.
New section:	5.11 Technical and Operating Requirements
	The Transmission Provider shall provide requirements in the Attachments to the interconnection agreement that must be met by the Interconnection Customer prior to initiating commercial operation. These shall include those technical and operating requirements that the Transmission Provider deems necessary, including without limitation any applicable Electric Reliability Standards and Requirements, and/or those necessary for the Interconnection Customer to operate within the Transmission Provider's Balancing Authority Area.
Attachments	
	Attachment 1, Glossary
New definition:	Balancing Authority Area (formerly known as Control Area) shall mean an electrical system or systems bounded by interconnection metering and telemetry, capable of controlling generation to maintain its interchange schedule with other Balancing Authority Areas and contributing to frequency regulation of the interconnection. A Balancing Authority Area must be certified by an Applicable Reliability Council.
New definition:	Queue Priority shall mean the order of a valid Interconnection Request, relative to all other pending valid Interconnection Requests, that is established based upon the date and time of receipt of the valid Interconnection Request by the Transmission Provider except as provided for in Section 4.2, Parking Lot
New definition:	Site Permit shall mean the authorizing document(s) issued by state or local governing bodies for the development of a new Generating Facility or modification to an existing Generating Facility .
	Attachment 4, System Impact Study Agreement
Attachment A to System Impact Study Agreement Assumptions Used in Conducting the System Impact Study The system impact study shall be based upon the results of the feasibility study, subject to any modifications in accordance with the standard Small Generator Interconnection Procedures, and the following assumptions: 1) Designation of Point of Interconnection and configuration to be studied. 2) Designation of alternative Points of Interconnection and configuration. 1) and 2) are to be completed by the Interconnection Customer. Other assumptions (listed below) are to be provided by the Interconnection Customer and the Transmission Provider. Other assumptions (listed below) are to be provided by the Interconnection Customer and the Transmission Provider.
SGIA:	
Throughout the SGIA, the word "parallel" has been deleted from the phrase "parallel operation" so as to read "operation". These edits are not shown below unless other changes occur in the same section.	
1.5.1 Compliance with WECC Reliability Criteria 1.5.1.1 Compliance. Interconnection Customer shall comply with the provisions of the WECC Reliability Criteria Agreement that are applicable to generators. All provisions of the WECC Reliability Criteria Agreement are hereby incorporated by reference into this Agreement as though set forth fully herein. Interconnection Customer shall for all purposes be considered a Participant as defined in the WECC Reliability Criteria Agreement, and shall be entitled to all of the rights and privileges and be subject to all of the obligations of a generator that is a Participant to that agreement, including but not limited to the rights, privileges and obligations set forth in sections 5 (Determination of Compliance), 6 (Review of RCC Determination), and 10 (Remedies) of the WECC Reliability Criteria Agreement.	1.5.1 Compliance with WECC Reliability Criteria 1.5.1.1 Compliance. Interconnection Customer shall comply with the provisions of the WECC Reliability Criteria Agreement that are applicable to generators. All provisions of the WECC Reliability Criteria Agreement are hereby incorporated by reference into this Agreement as though set forth fully herein. Interconnection Customer shall for all purposes be considered a Participant as defined in the WECC Reliability Criteria Agreement, and shall be entitled to all of the rights and privileges and be subject to all of the obligations of a generator that is a Participant to that agreement, including but not limited to the rights, privileges and obligations set forth in sections 5 (Determination of Compliance), 6 (Review of RCC Determination), and 10 (Remedies) of the WECC Reliability Criteria Agreement.
1.5.1.2 Payment of Sanctions. Interconnection Customer shall be responsible for payment of any monetary sanction assessed against Customer by WECC pursuant to the WECC Reliability Criteria Agreement. Any such payment shall be made pursuant to the procedures specified in the WECC Reliability Criteria Agreement.	1.5.1.2 Payment of Sanctions. Interconnection Customer shall be responsible for payment of any monetary sanction assessed against Customer by WECC pursuant to the WECC Reliability Criteria Agreement. Any such payment shall be made pursuant to the procedures specified in the WECC Reliability Criteria Agreement.

SGIP:	
<p>1.5.1.3 WECC Remedy.</p> <p>Transmission Provider and Interconnection Customer expressly intend that WECC is a third-party beneficiary to this agreement for purposes of this Article 4.3.1. The WECC shall have the right to seek to enforce against Customer any provision of this Article 4.3.1, provided that specific performance shall be the sole remedy available to the WECC for enforcement of the provisions of this Article 4.3.1, other than payment to the WECC of monetary sanctions under the WECC Reliability Criteria Agreement.</p>	<p>1.5.1.3 WECC Remedy.</p> <p>Transmission Provider and Interconnection Customer expressly intend that WECC is a third-party beneficiary to this agreement for purposes of this Article 4.3.1. The WECC shall have the right to seek to enforce against Customer any provision of this Article 4.3.1, provided that specific performance shall be the sole remedy available to the WECC for enforcement of the provisions of this Article 4.3.1, other than payment to the WECC of monetary sanctions under the WECC Reliability Criteria Agreement.</p>
<p>1.5.1.4 Termination.</p> <p>Interconnection Customer may terminate its obligations under this Article 4.3.1 (other than its obligations under Article 4.3.1.5):</p> <p>(a) if after the effective date of this LGIA, the requirements of the WECC Reliability Criteria Agreement applicable to Customer are amended so as to adversely affect Interconnection Customer, provided that, within fortyfive (45) days of the date of issuance of a FERC order accepting such amendment for filing, Interconnection Customer gives fifteen (15) days' written notice of such termination to Bonneville and the WECC; and provided further that such forty-five (45) day period may be extended by Interconnection Customer for an additional forty-five (45) days if Interconnection Customer gives written notice to Transmission Provider of such requested extension within the initial forty-five (45) day period; or (b) for any reason on one year's written notice to Transmission Provider and the WECC.</p>	<p>1.5.1.4 Termination.</p> <p>Interconnection Customer may terminate its obligations under this Article 4.3.1 (other than its obligations under Article 4.3.1.5):</p> <p>(a) if after the effective date of this LGIA, the requirements of the WECC Reliability Criteria Agreement applicable to Customer are amended so as to adversely affect Interconnection Customer, provided that, within fortyfive (45) days of the date of issuance of a FERC order accepting such amendment for filing, Interconnection Customer gives fifteen (15) days' written notice of such termination to Bonneville and the WECC; and provided further that such forty five (45) day period may be extended by Interconnection Customer for an additional forty-five (45) days if Interconnection Customer gives written notice to Transmission Provider of such requested extension within the initial forty-five (45) day period; or (b) for any reason on one year's written notice to Transmission Provider and the WECC.</p>
<p>1.5.1.5 Replacement Terms.</p> <p>If Interconnection Customer exercises its right to terminate its obligations under this Article 4.3.1, Interconnection Customer and Transmission Provider shall use good faith efforts to negotiate an amendment to this LGIA imposing obligations on Interconnection Customer to meet reliability criteria satisfactory to Transmission Provider.</p>	<p>1.5.1.5 Replacement Terms.</p> <p>If Interconnection Customer exercises its right to terminate its obligations under this Article 4.3.1, Interconnection Customer and Transmission Provider shall use good faith efforts to negotiate an amendment to this LGIA imposing obligations on Interconnection Customer to meet reliability criteria satisfactory to Transmission Provider.</p>
<p>1.5.1.6 Consent.</p> <p>Interconnection Customer consents to the release by the WECC of information related to Interconnection Customer's compliance with this LGIA, provided that such information is released in accordance with the WECC Reliability Criteria Agreement.</p>	<p>1.5.1.6 Consent.</p> <p>Interconnection Customer consents to the release by the WECC of information related to Interconnection Customer's compliance with this LGIA, provided that such information is released in accordance with the WECC Reliability Criteria Agreement.</p>
<p>1.5.1.7 Definitions</p> <p>(a) WECC shall mean the Western Electricity Reliability Council or its successor.</p> <p>(b) WECC Reliability Criteria Agreement shall mean the WECC Reliability Criteria Agreement dated June 18, 1999, among the WECC and certain of its Member transmission operators, as such may be amended or replaced from time to time.</p>	<p>1.5.1.7 Definitions</p> <p>(a) WECC shall mean the Western Electricity Reliability Council or its successor.</p> <p>(b) WECC Reliability Criteria Agreement shall mean the WECC Reliability Criteria Agreement dated June 18, 1999, among the WECC and certain of its Member transmission operators, as such may be amended or replaced from time to time.</p>
<p>1.7 Metering</p> <p>The Interconnection Customer shall be responsible for the Transmission Provider's reasonable and necessary cost for the purchase, installation, operation, maintenance, testing, repair, and replacement of metering and data acquisition equipment specified in Attachments 2 and 3 of this Agreement. The Interconnection Customer's metering (and data acquisition, as required) equipment shall conform to applicable industry rules, and Operating Requirements..</p>	<p>1.7 Metering</p> <p>The Interconnection Customer shall be responsible for the Transmission Provider's reasonable and necessary cost for the purchase, installation, operation, maintenance, testing, repair, and replacement of metering and data acquisition equipment specified in Attachments 2 and 3 of this Agreement. The Interconnection Customer's metering (and data acquisition, as required) equipment shall conform to applicable industry rules, and the Transmission Provider's Operating Requirements.</p>
<p>1.8.1 The Interconnection Customer shall design its Small Generating Facility to maintain a composite power delivery at continuous rated power output at the Point of Interconnection at a power factor within the range of 0.95 leading to 0.95 lagging, unless the Transmission Provider has established different requirements that apply to all similarly situated generators in the control area on a comparable basis. The requirements of this paragraph shall not apply to wind generators.</p>	<p>1.8.1 The Interconnection Customer shall design its Small Generating Facility to maintain a composite power delivery at continuous rated power output at the Point of Interconnection at a power factor within the range of 0.95 leading to 0.95 lagging, unless the Transmission Provider has established different requirements that apply to all similarly situated generators in the control area on a comparable basis. The requirements of this paragraph shall not apply to wind generators. The requirements for wind generators and non-synchronous generators shall be specified in attachment 5.</p>
<p>2.2.2 The Interconnection Customer shall not operate its Small Generating Facility in parallel with the Transmission Provider's Transmission System without prior written authorization of the Transmission Provider. The Transmission Provider will provide such authorization once the Transmission Provider receives notification that the Interconnection Customer has complied with all applicable parallel operation requirements. Such authorization shall not be unreasonably withheld, conditioned, or delayed.</p>	<p>2.2.2 The Interconnection Customer shall not operate its Small Generating Facility without prior written authorization of the Transmission Provider. The Transmission Provider will provide such authorization once the Transmission Provider receives notification that the Interconnection Customer has complied with all applicable operation requirements. Such authorization shall not be unreasonably withheld, conditioned, or delayed.</p>
<p>3.3.4 Upon termination of this Agreement, the Small Generating Facility will be disconnected from the Transmission Provider's Transmission System. All costs required to effectuate such disconnection shall be borne by the terminating Party, unless such termination resulted from the nonterminating Party's Default of thisSGIA or such nonterminating Party otherwise is responsible for these costs under this SGIA.</p>	<p>3.3.4 Upon termination of this Agreement, the Small Generating Facility will be disconnected from the Transmission Provider's Transmission System. All costs required to effectuate such disconnection shall be borne by the terminating Party, unless such termination resulted from the nonterminating Party's Default of this Agreement or such nonterminating Party otherwise is responsible for these costs under this Agreement.</p>
<p>3.3.6 This provisions of this article shall survive termination or expiration of this Agreement.</p>	<p>3.3.6 The provisions of this article shall survive termination or expiration of this Agreement.</p>

SGIP:	
<p>5.2 Network Upgrades The Transmission Provider or the Transmission Owner shall design, procure, construct, install, and own the Network Upgrades described in Attachment 6 of this Agreement. If the Transmission Provider and the Interconnection Customer agree, the Interconnection Customer may construct Network Upgrades that are located on land owned by the Interconnection Customer. Unless the Transmission Provider elects to pay for Network Upgrades, the actual cost of the Network Upgrades, including overheads, shall be borne initially by the Interconnection Customer.</p>	<p>5.2 Network Upgrades The Transmission Provider or the Transmission Owner shall design, procure, construct, install, and own the Network Upgrades described in Attachment 6 of this Agreement. If the Transmission Provider and the Interconnection Customer agree, the Interconnection Customer may construct Network Upgrades that are located on land owned by the Interconnection Customer. Unless the Transmission Provider elects to pay for Network Upgrades, the actual cost of the Network Upgrades, including overheads, shall be borne initially by the Interconnection Customer. Transmission Provider shall allocate the total costs, on a pro rata basis, of Network Upgrades and Transmission Provider's interconnection facilities that, as determined by the Transmission Provider, are necessary to support the interconnection of any interconnection request connecting within five (5) years of the initial date those upgrades and facilities are placed in service.</p>
<p>6.1.1 The Transmission Provider shall bill the Interconnection Customer for the design, engineering, construction, and procurement costs of Interconnection Facilities and Upgrades contemplated by this Agreement on a monthly basis, or as otherwise agreed by the Parties. The Interconnection Customer shall pay each bill within 30 calendar days of receipt, or as otherwise agreed to by the Parties.</p>	<p>6.1.1 The Interconnection Customer shall advance the estimated cost of the design, engineering, construction, and procurement costs of Interconnection Facilities and Upgrades contemplated by this Agreement.</p>
	<p>Article 13 Notices has been deleted from the body of the SGIA and inserted as the new Attachment 7.</p>
<p>New Attachment:</p>	<p>Attachment 7 - Notices 1. General Unless otherwise provided in this Agreement, any written notice, demand, or request required or authorized in connection with this Agreement ("Notice") shall be deemed properly given if delivered in person, delivered by recognized national courier service, or sent by first class mail, postage prepaid, to the person specified below: If to the Interconnection Customer: Interconnection Customer: _____ Attention: _____ Address: _____ _____ City: _____ State: _____ Zip: _____ Phone: _____ Fax: _____ If to the Transmission Provider: Transmission Provider: _____ Attention: _____ Address: _____ _____ City: _____ State: _____ Zip: _____ Phone: _____ Fax: _____</p>
	<p>2. Alternative Forms of Notice Any notice or request required or permitted to be given by either Party to the other and not required by this Agreement to be given in writing may be so given by telephone, facsimile or e-mail to the telephone numbers and e-mail addresses set out below. For any service interruptions, Emergency Conditions, operating instructions, curtailments, or dispatch orders, Transmission Provider may notify Interconnection Customer through any of the following methods: (1) by electronic signal pre-arranged between Interconnection Customer and Transmission Provider, (2) by telephone, facsimile or email to the telephone numbers and email addresses set out in this Attachment, Addresses for delivery of Notices and Billings, (3) by a change request to a transaction submitted according to the NERC e-Tag protocol, or (4) as otherwise agreed between Interconnection Customer and Transmission Provider. Transmission Provider is not responsible for ensuring that Interconnection Customer has the continuous ability to receive Transmission Provider's electronic signals.</p>
